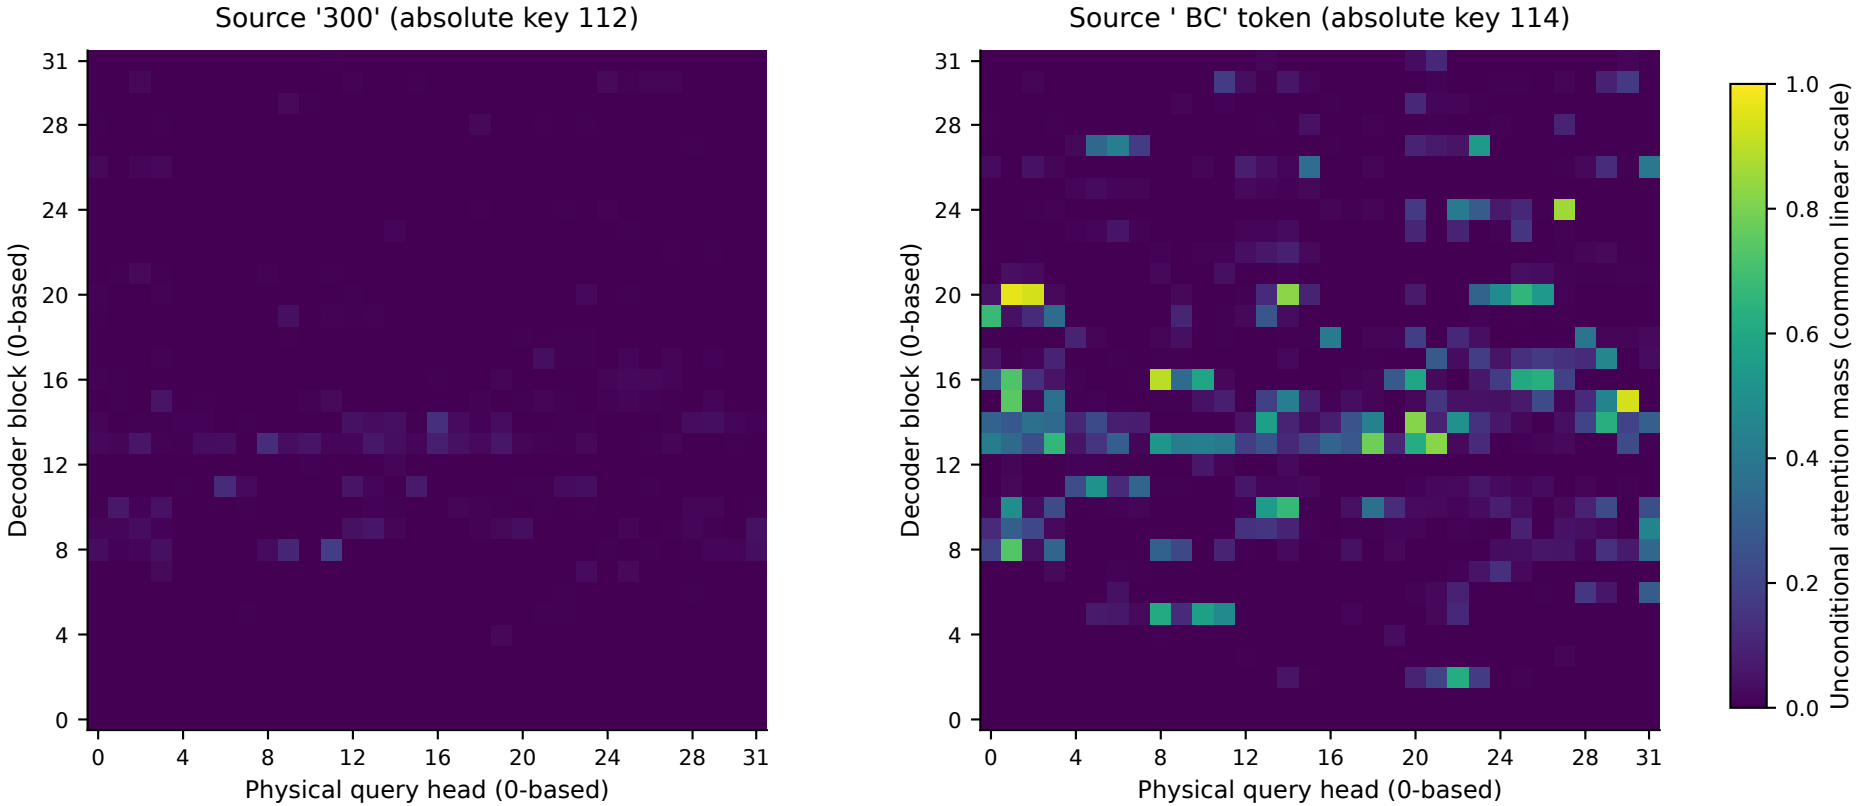
Source token access before original 'ago'

Query 424 = after original years / before original ago; all 32 blocks x 32 heads



All 1,024 layer/head pairs shown without selection; correlated pairs are not independent votes.
The BC token includes leading whitespace; token attention is not character-level attribution.

One exposed observer example; attention is not semantic correctness or causal necessity.
FP32 producer identity passed; strict FP64 reference check remains inconclusive.
