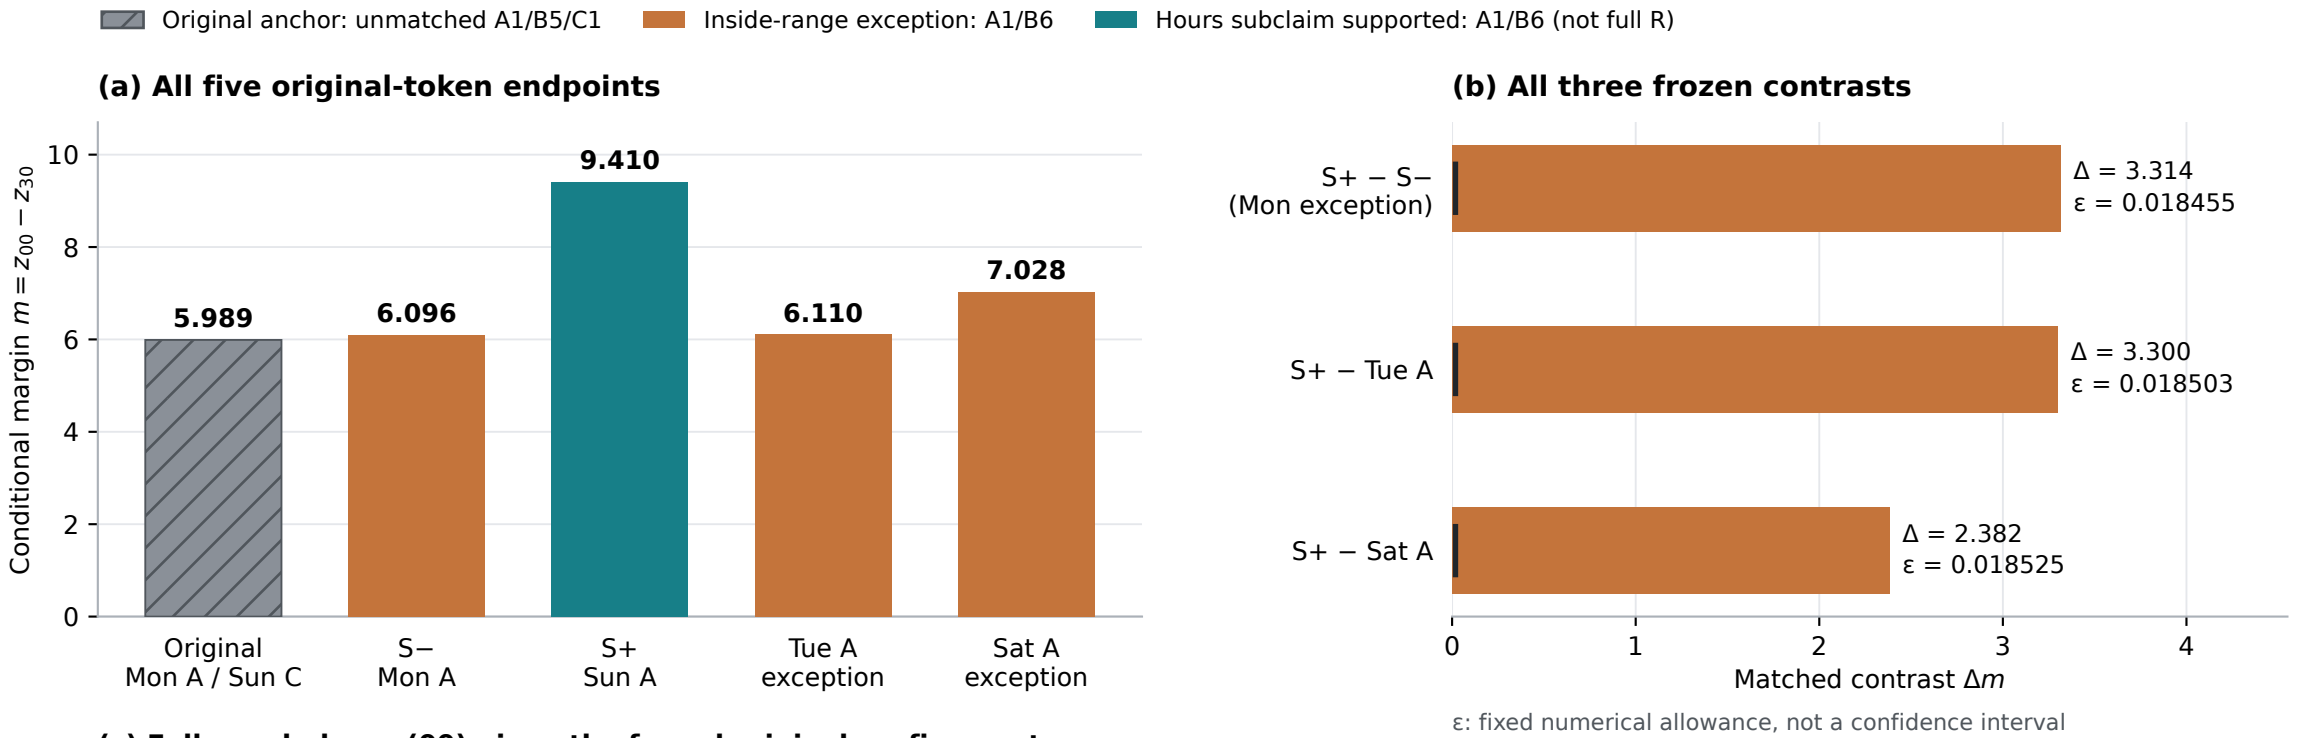
M5 · Fixed-response hours diagnostic

Case 5670 / source 13601 · 5 full model + 5 full head calls across two runs (2 + 3) · all 185 original targets retained



(c) Full-vocabulary p(00) given the forced original prefix — not accuracy

	Original anchor	S− / Mon A	S+ / Sun A	Tue A	Sat A
p(00)	0.99742955	0.99761885	0.99983370	0.99753618	0.99901581

Finite diagnostics; no AUROC or detector evaluation. All five worlds still prefer 00 over 30.

30 is not a complete-range-correct alternative. The supported world also puts A in the last (Sunday) field; position/order heuristics and unchanged Sunday-morning/brunch review context remain confounds.

A = 17:30–23:00; B = 17:00–21:00; C = 09:00–14:00. Source: sealed independent audit 42cd1c32ffca.
